PROFESSIONAL TRAINERS

IN THE FRAMEWORK
OF THE PROJECT

AspirE

Asian **p**rospects
in (**re**)migration
to/within the **EU**

Dr. Anuja Cabraal
NVivo trainer

NVIVO

Dr. Cabraal has been a global certified platinum trainer of NVivo for over a decade, and she enjoys showing people how to apply the software for research purposes. She is also proficient in other qualitative research software such as Quirkos. Her skills enable her to work in a variety of qualitative research areas and disciplines, however her specialty is in qualitative methods and methodology.

Dr. Susanne Friese
ATLAS.ti trainer

atlas.ti

Dr. Susanne Friese is an accomplished expert in qualitative methods and data analysis, with over three decades of experience in the field. Her extensive knowledge and expertise have been applied to numerous research projects, teaching and consulting engagements across the globe. She is a prolific writer and has published many articles on qualitative research studies and methodological matters.

Dr. Antoine Roblain
Network Canvas trainer

NETWORK
canvas

Dr. Antoine Roblain is a lecturer in social psychology at the ULB. His research focuses on the psychological dimensions of mobility and migration, specifically concerning the experiences of newcomers in Western societies. Over the last few years and through various projects, he has been conducting research on the topic of migrant social networks using Network Canvas as a tool for collecting these networks.
